

Items for Subscales for the Quality of Life Index (QLI) – Multiple Sclerosis III Version

Five scores are calculated for the Ferrans and Powers Quality of Life Index: (1) Total Quality of Life Score (2) Health and functioning subscale score, (3) Social and economic subscale score, (4) Psychological/spiritual subscale score, and (5) Family subscale score. Items listed below are from both Part 1 (Satisfaction) and Part 2 (Importance). For example, A1. Health@ refers to question #1 in Part 1 and question #1 in Part 2.
